

Test Report issued under the responsibility of:

intertek
Total Quality. Assured.

**TEST REPORT
IEC 62368-1**

**Audio/video, information and communication technology equipment
Part 1: Safety requirements**

Report Number : 2510B0397SHA-001

Date of issue : 2026-02-02

Total number of pages : 57 pages

Name of Testing Laboratory preparing the Report : Intertek Testing Services (Shanghai FTZ) Co., Ltd.

Applicant's name : Status Research and Development GmbH

Address : Baarerstrasse 10, 6302 Zug, Switzerland

Test specification:

Standard : UL 62368-1:2019 Ed.3+R:22Oct2021
CSA C22.2#62368-1:2019 Ed.3+U1

Test procedure : Testing

Non-standard test method : N/A

TRF template used : IECEE OD-2020-F1:2021, Ed.1.4

Test Report Form No. : IEC62368_1E

Test Report Form(s) Originator.... : UL(US)

Master TRF : Dated 2022-04-14

Copyright © 2022 IEC System of Conformity Assessment Schemes for Electrotechnical Equipment and Components (IECEE System). All rights reserved.

This publication may be reproduced in whole or in part for non-commercial purposes as long as the IECEE is acknowledged as copyright owner and source of the material. IECEE takes no responsibility for and will not assume liability for damages resulting from the reader's interpretation of the reproduced material due to its placement and context.

If this Test Report Form is used by non-IECEE members, the IECEE/IEC logo and the reference to the CB Scheme procedure shall be removed.

This report is not valid as a CB Test Report unless signed by an approved CB Testing Laboratory and appended to a CB Test Certificate issued by an NCB in accordance with IECEE 02.

General disclaimer:

The test results presented in this report relate only to the object tested.

This report shall not be reproduced, except in full, without the written approval of the Issuing CB Testing Laboratory. The authenticity of this Test Report and its contents can be verified by contacting the NCB, responsible for this Test Report.

List of Attachments (including a total number of pages in each attachment):

Page 48 - 54: National differences for USA and Canada
Page 55 - 57: Photograph of the Equipment under test (EUT).

Summary of testing:

All tests are performed and the most disadvantageous results are recorded. We conclude that the appliances comply with this standard.

Tests performed (name of test and test clause):

5.2, Classification of electrical energy sources
5.4.1.4, 6.3, 6.4, 9.0, B.2.6, B.3, B.4,
Annex G.5.3, G.5.4, Heating test and abnormal & fault condition test
6.2.2, Electrical power sources (PS) measurements for classification
Annex B.2.5 Input test
Annex B.3, B.4, Abnormal operating and fault condition tests
Annex M.3, Protection circuits for batteries provided within the equipment
Annex M.4.2, Charging safeguards for equipment containing a secondary lithium battery

Testing location:

Intertek Testing Services (Shanghai FTZ) Co., Ltd.
Building 86, No.1198, Qinzhou North Road,
Shanghai, China

Summary of compliance with National Differences (List of countries addressed):

National differences for USA and Canada have been checked.

The product fulfils the requirements of UL 62368-1:2019 Ed.3+R:22Oct2021 and
CSA C22.2#62368-1:2019 Ed.3+U1

Use of uncertainty of measurement for decisions on conformity (decision rule) :

- No decision rule is specified by the IEC standard, when comparing the measurement result with the applicable limit according to the specification in that standard. The decisions on conformity are made without applying the measurement uncertainty ("simple acceptance" decision rule, previously known as "accuracy method").
- Other:... (to be specified, for example when required by the standard or client, or if national accreditation requirements apply)

Information on uncertainty of measurement:

The uncertainties of measurement are calculated by the laboratory based on application of criteria given by OD-5014 for test equipment and application of test methods, decision sheets and operational procedures of IECEE.

IEC Guide 115 provides guidance on the application of measurement uncertainty principles and applying the decision rule when reporting test results within IECEE scheme, noting that the reporting of the measurement uncertainty for measurements is not necessary unless required by the test standard or customer.

Calculations leading to the reported values are on file with the NCB and testing laboratory that conducted the testing.

Copy of marking plate:

The artwork below may be only a draft. The use of certification marks on a product must be authorized by the respective NCBs that own these marks.

Possible test case verdicts:

- test case does not apply to the test object.....: N/A
- test object does meet the requirement.....: P (Pass)
- test object does not meet the requirement....: F (Fail)

Testing:

Date of receipt of test item: 2025-10-21

Date (s) of performance of tests: 2025-10-21 to 2025-12-8

General remarks:

"(See Enclosure #)" refers to additional information appended to the report.

"(See appended table)" refers to a table appended to the report.

Throughout this report a comma / point is used as the decimal separator.

Determination of the test conclusion is based on IEC Guide 115 in consideration of measurement uncertainty.

This report is for the exclusive use of Intertek's Client and is provided pursuant to the agreement between Intertek and its Client. Intertek's responsibility and liability are limited to the terms and conditions of the agreement. Intertek assumes no liability to any party, other than to the Client in accordance with the agreement, for any loss, expense or damage occasioned by the use of this report. Only the Client is authorized to permit copying or distribution of this report and then only in its entirety. Any use of the Intertek name or one of its marks for the sale or advertisement of the tested material, product or service must first be approved in writing by Intertek. The observations and test results in this report are relevant only to the sample tested. This report by itself does not imply that the material, product, or service is or has ever been under an Intertek certification program.

When determining the test conclusion, the Measurement Uncertainty of test has been considered.

Manufacturer's Declaration per sub-clause 4.2.5 of IECEE 02:

The application for obtaining a CB Test Certificate includes more than one factory location and a declaration from the Manufacturer stating that the sample(s) submitted for evaluation is (are) representative of the products from each factory has been provided

Yes
 Not applicable

When differences exist; they shall be identified in the General product information section.

Name and address of factory (ies) : ALTYOR Industries (Shanghai) Co., Ltd
 152/1421 Zhuan Xing Dong Road Minhang District,
 Shanghai, 201108, CHINA

General product information and other remarks:

The EUT is a keycard shell, class III of equipment for indoor use only, which supplied by built-in lithium battery, 3.7Vdc, the adaptor output is considered as ES1 and PS1 circuit.

Maximum recommended ambient (Tmra):40°C

| | | | |
|-----------------------|--|---|-----|
| 1 (1DV.1) (1.3) | All equipment is to be designed to allow installation in accordance with the National Electrical Code (NEC), ANSI/NFPA 70, the Canadian Electrical Code (CEC), Part 1, CAN/CSA C22.1, and when applicable, the National Electrical Safety Code, IEEE C2. Also, for such equipment marked or otherwise identified, installation is allowed per the Standard for the Protection of Information Technology Equipment, ANSI/NFPA 75. | In accordance with the National Electrical Code (NEC) and the Canadian Electrical Code (CEC) part 1 CAN/CSA C22.1, ANSI/NFPA 70, and unless marked or otherwise identified, the Standard for Electronic Computer/Data-Processing Equipment, ANSI/NFPA 75. | P |
| 1 (1DV.2.1) | This standard includes additional requirements for equipment used for entertainment purposes intended for installation in general patient care areas of health care facilities. See Annex DVB. | Not such application. | N/A |
| 1 (1DV.2.2) | This standard includes additional requirements for equipment intended for mounting under cabinets. See Annex DVC. | Not such application. | N/A |
| 1 (1DV.2.3) | IEC 62368-3 clause 5 for DC power transfer at ES1 or ES2 voltage levels is considered informative. IEC 62368-3 clause 6 for remote power feeding telecommunication (RFT) circuits is considered normative (see ITU K.50). Alternatively, equipment with RFT circuits are given in either UL 2391 or CSA/UL 60950-21. RFT-C circuits are not permitted unless the RFT-C circuit complies with RFT-V limits ($\leq 200V$ per conductor to earth). | Not such application. | N/A |
| 1 (1DV.3) | For protection against direct lightning strikes, reference is made to NFPA 780 and CAN/CSA-B72 for additional requirements. | Not such application. | N/A |

| IEC 62368-1 | | | |
|--------------------------------------|--|---|---------|
| Clause | Requirement + Test | Result - Remark | Verdict |
| 1 (DV.5) | Additional requirements apply to some forms of power distribution equipment, including sub-assemblies. | | N/A |
| 4.1 (4.1.17) | <i>For lengths exceeding 3.05 m, external interconnecting cable assemblies are required to be a suitable cable type (e.g., DP, CL2) specified in the NEC.</i> | Not exceeding 3.05 m. | N/A |
| | <i>For lengths 3.05 m or less, external interconnecting cable assemblies that are not types specified in the NEC generally are required to have special construction features and identification markings.</i> | Overall acceptance has to be evaluated during the national approval process. | N/A |
| 4.6 (4.6.2) | Wire-wrap terminals have special construction and performance requirements. | No such parts. | N/A |
| 4.8 (4.8.3, 4.8.4.5, 4.8.5) | Coin / button cell batteries have modified special construction and performance requirements. | No such parts. | N/A |
| 5.4.2.3.2 (5.4.2.3.2.1) | <i>Surge Arrestors and Transient Voltage Surge Suppressors installed external to the equipment are required to comply with the appropriate NEC and CEC requirements.</i> | No such parts. | N/A |
| 5.5.9 | Receptacles, rated 125-V, single phase, 15- or 20-A accessible to either ordinary, instructed, or skilled persons are required to be provided with GFCI Protection for Personnel if the equipment containing the receptacles is installed outdoors. The protection devices are required to comply with UL 943, and CAN/CSA C22.2 No.144. | No outdoor equipment. | N/A |
| 5.6.3 | Protective earthing conductors comply with the minimum conductor sizes in Table G.7, except as required by Table G.7ADV.1 for cord connected equipment, or Annex DVH for permanently connected equipment. | An appliance inlet provided that is connected by an approved appliance coupler serves as main protective earthing terminal. No power supply cord is provided. | N/A |

| IEC 62368-1 | | | |
|----------------------|--|---|---------|
| Clause | Requirement + Test | Result - Remark | Verdict |
| 5.7.8 (5.7.8.1) | Equipment intended to receive telecommunication ringing signals is required to comply with a special touch current measurement tests. | No TNV circuits within the equipment. | N/A |
| 6.5.1 | PS3 wiring outside a fire enclosure is required to comply with single fault testing in B.4, or be current limited per one of the permitted methods. | No such parts. | N/A |
| Annex F (F.3.3.9) | Output terminals provided for supply of other equipment, except mains supply, are required to be marked with a maximum rating or reference to equipment permitted to be connected. | No DC output connector is provided. | N/A |
| Annex F (F.3.7) | Outdoor Enclosures are required to be classified and marked in accordance with UL 50 or 50E, or CAN/CSA C22.2 No. 94.1 or 94.2. | No outdoor equipment. | N/A |
| Annex G (G.7) | Permanent connection of equipment to the mains supply by a power supply cord is not permitted, except for certain equipment, such as ATMs. | The equipment is not permanent connection equipment. | N/A |
| | Power supply cords are required to have attachment plugs rated not less than 125 percent of the rated current of the equipment. | No power supply cord is provided. | N/A |
| | Flexible power supply cords are required to be compatible with Article 400 of the NEC, and Tables 11 and 12 of the CEC. | See above. | N/A |
| | Minimum cord length is required to be 1.5 m, with certain constructions such as external power supplies allowed to consider both input and output cord lengths into the requirement. Power supply cords are required to be no longer than 4.5 m in length if used in ITE Rooms. | See above. | N/A |
| | Power supply cords for outdoor equipment are required to be suitable outdoor use type as required by Section 400.4 of the NEC and Rule 4-012 of the CEC, i.e., marked "W." | No outdoor equipment. | N/A |
| Annex H.2 | Continuous ringing signals under normal operating conditions up to 16 mA only are permitted if the equipment is subjected to special installation and performance restrictions. | No TNV circuits within the equipment. | N/A |
| Annex H.4 | For circuits with other than ringing signals and with voltages exceeding 42.4 Vpeak or 60 Vd.c., the maximum acceptable current through a 2000 ohm resistor (or greater) connected across the voltage source with other loads disconnected is 7.1 mA peak or 30 mA d.c. under normal operating conditions. | No TNV circuits within the equipment. | N/A |
| Annex Q (Q.3) | Equipment with paired conductor and/or coax communications cables/wiring connected to building wiring are required to have special voltage, current, power and marking requirements. | The equipment not intended to be used within such environments. | N/A |

| IEC 62368-1 | | | |
|-------------------|---|---|---------|
| Clause | Requirement + Test | Result - Remark | Verdict |
| Annex DVA (1) | Equipment that is designed such that it may be powered from a separate electrical service, is required to meet applicable requirements for service equipment for control and protection of services and their installation and complies with Article 230 of the National Electrical Code (NEC), NFPA 70 and Section 6 of the Canadian Electrical Code, Part I, CSA C22.1. | The equipment not intended to be used within such environments. | N/A |
| | Equipment intended for use in spaces used for environmental air (plenums) are subjected to special flammability requirements for heat and visible smoke release. | The equipment not intended to be used within such environments. | N/A |
| | For ITE room applications, automated information storage systems with combustible media greater than 0.76 m ³ (27 cu ft) are required to have a provision for connection of either automatic sprinklers or a gaseous agent extinguishing system with an extended discharge. | Not such equipment. | N/A |
| | Consumer products designed or intended primarily for children 12 years of age or younger are subject to additional requirements in accordance with U.S. and Canadian Regulations. | The equipment is not for children used. | N/A |
| | Baby monitors are required to additionally comply with ASTM F2951, Consumer Safety Specification for Baby Monitors. | Not a baby monitors. | N/A |
| | Storage batteries and battery management equipment, other than associated with lead-acid batteries, and including battery backup systems that are not an integral part of stationary AV and ICT equipment, such as provided in separate cabinets, are required to be certified (listed) to the appropriate standard(s) for such storage batteries and equipment. | Not such equipment. | N/A |
| Annex DVA (5.6) | For Pluggable Equipment Type A, the protection in the installation is assumed to be 20A. | Considered. | P |
| Annex DVA (6.3) | The maximum quantity of flammable liquid stored in equipment is required to comply with NFPA 30. | No flammable liquids within the equipment. | N/A |
| Annex DVA (6.4.8) | For ITE room applications, enclosures with combustible material measuring greater than 0.9 m ² (10 sq ft) or a single dimension greater than 1.8 m (6 ft) are required to have a flame spread rating of 50 or less. For equipment with the same dimensions for other applications, an external surface that is not a fire enclosure requires a minimum flammability classification of V-1. | No such application. | N/A |
| Annex DVA (10.3) | Equipment with lasers is required to meet the U.S. Code of Federal Regulations 21 CFR 1040 (and the Canadian Radiation Emitting Devices Act, REDR C1370). | No such parts. | N/A |

| IEC 62368-1 | | | |
|---------------------|---|---|---------|
| Clause | Requirement + Test | Result - Remark | Verdict |
| Annex DVA (10.5) | Equipment that produces ionizing radiation is required to comply with the U.S. Code of Federal Regulations, 21 CFR 1020 (and the Canadian Radiation Emitting Devices Act, REDR C1370). | No such parts. | N/A |
| Annex DVA (F.3.3.4) | Equipment for use on a.c. mains supply systems with a neutral and more than one phase conductor (e.g. 120/240 V, 3-wire) require a special marking format for electrical ratings. Additional considerations apply for voltage ratings that exceed the attachment cap rating or that are lower than the "Normal Operating Condition" in Table 2 of CAN/CSA C22.2 No. 235." | Single phase only. | N/A |
| Annex DVA (F.3.3.6) | Equipment identified for ITE (computer) room installation is required to be marked with the rated current. | Not such application. | N/A |
| Annex DVA (G.1) | Vertically-mounted disconnect switches and circuit breakers are required to have the "on" position indicated by the handle in the up position. | No such parts. | N/A |
| Annex DVA (G.3.4) | Suitable NEC/CEC branch circuit protection rated at the maximum circuit rating is required for all standard supply outlets and receptacles (such as supplied in power distribution units) if the supply branch circuit protection is not suitable. | No standard supply outlets, receptacles, medium-base or smaller lampholders are provided. | N/A |
| | Where a fuse is used to provide Class 2 or Class 3 current limiting, it is not operator-accessible unless it is non-interchangeable. | No such parts. | N/A |
| Annex DVA (G.4.2) | Equipment with isolated ground (earthing) receptacles is required to comply with NEC 250.146(D) and CEC 10-400 and 10-612. | No such parts. | N/A |
| Annex DVA (G.4.3) | Interconnection of units by conductors supplied by a limited power source, or a Class 2 circuit defined in the NEC/CEC may have field wiring connections other than specified in DVH.3, such as wire-wrap and crimp-on types, if the limited power source and Class 2 circuits are separated from all other circuits by barriers, routing or fixing. | No such parts. | N/A |
| Annex DVA (G.5.3) | Power distribution transformers distributing power at 100 volts or more, and rated 10 kVA or more, require special transformer overcurrent protection. | No such parts. | N/A |
| Annex DVA (G.5.4) | Motor control devices are required for cord-connected equipment with a mains-connected motor if the equipment is rated more than 12 A, or if the equipment has a nominal voltage rating greater than 120 V, or if the motor is rated more than 1/3 hp (locked rotor current over 43 A). | No such parts. | N/A |
| Annex DVA (G.7) | Flexible cords used outdoors are required to have the suffix "W" marked on the flexible cord. | No such parts. | N/A |

| IEC 62368-1 | | | |
|-------------------|---|---|---------|
| Clause | Requirement + Test | Result - Remark | Verdict |
| Annex DVA (M) | For ITE room applications, equipment with battery systems capable of supplying 750 VA for five minutes are required to have a battery disconnect means that may be connected to the ITE room remote power-off circuit. | Not such application. | N/A |
| Annex DVA (Q) | If applicable per NEC 725.121(C), some limited power sources supplied from AV/ICT equipment are required to have a label indicating the maximum voltage and maximum current, or maximum voltage and nominal current output for each connection point. Where multiple connection points have the same rating, a single label is permitted to be used. | Not applicable for the equipment. | N/A |
| | Wiring terminals intended to supply Class 2 outputs in accordance with the NEC or CEC Part 1 are required to be marked with the voltage rating and "Class 2" or equivalent. The marking is located adjacent to the terminals and visible during wiring. | Not applicable for the equipment. | N/A |
| | Applicable parts of Chapter 8 of the NEC, and Rules 54 and 60 of the CEC, may be applicable to ITE installed outdoors with connections to communication systems. | No outdoor equipment. | N/A |
| Annex DVB (1) | Additional requirements apply for equipment used for entertainment purposes intended for installation in general patient care areas of health care facilities. | Not such application. | N/A |
| Annex DVC (1) | Additional requirements apply for equipment intended for mounting under kitchen cabinets. | Not such application. | N/A |
| Annex DVE (4.1.1) | Some equipment, components, sub-assemblies and materials associated with the risk of fire, electric shock, or personal injury are required to have component or material ratings in accordance with the applicable national (U.S. and Canadian) component or material requirements. These equipment and components include: appliance couplers, attachment plugs, battery backup systems, circuit breakers, communication circuit accessories, connectors (used for current interruption of non-LPS circuits), direct plug-in equipment, electrochemical capacitor modules (energy storage modules with ultracapacitors), enclosures (outdoor), flexible cords and cables, fuses (branch circuit), ground-fault current interrupters, interconnecting cables, modular data centers, power supply cords, some power distribution equipment, printed wiring, protectors for communications circuits, receptacles, surge protective devices, vehicle battery adapters, wire connectors, and wire and cables. | UL approved components are used. Refer to table 4.1.2 of IEC 62368-1 test report for details. | P |

| IEC 62368-1 | | | |
|---------------------|---|---|---------|
| Clause | Requirement + Test | Result - Remark | Verdict |
| Annex DVH | Equipment for permanent connection to the mains supply is subjected to additional requirements. | The equipment is not permanently connected equipment. | N/A |
| Annex DVH (DVH.1) | Wiring methods (terminals, leads, etc.) used for the connection of the equipment to the mains are required to be in accordance with the NEC/CEC. | The equipment is pluggable equipment type A. | N/A |
| Annex DVH (DVH.3.2) | Terminals for permanent wiring, including protective earthing terminals, are required to be suitable for U.S./Canadian wire gauge sizes, rated 125 percent of the equipment rating, and be specially marked when specified. | No terminals for permanent wiring. | N/A |
| | Wire binding screws are not permitted to attach conductors larger than 10 AWG (5.3 mm ²). | No wire binding screws. | N/A |
| Annex DVH (DVH.4) | Permanently connected equipment is required to have a suitable wiring compartment and wire bending space. | The equipment is not permanently connected equipment. | N/A |
| Annex DVH (DVH 5.5) | Equipment connected to a centralized d.c. power system, and having one pole of the DC mains input terminal connected to the main protective earthing terminal in the equipment, is required to comply with special earthing, wiring, marking and installation instruction requirements. | The equipment not connected to a centralized d.c. power system. | N/A |
| Annex DVI (6.7) | Equipment intended for connection to telecommunication network outside plant cable is required to be protected against overvoltage from power line crosses. | No TNV circuits within the equipment. | N/A |
| Annex DVJ (10.6.1) | Equipment connected to a telecommunication and cable distribution networks and supplied with an earphone intended to be held against, or in the ear is required to comply with special acoustic pressure requirements. | No TNV circuits within the equipment. | N/A |
